

How to configure your Windows XP PC for Gilroy Wireless Hotspot?

These instructions are for configuring a Windows XP PC for access to the City of Gilroy's Wireless Hotspot.

1. **Right** Click the **Wireless Network** icon in the system tray located in the bottom right-hand side of the taskbar (see Figure A).

Figure A

2. From the pop-up menu click on “**View Available Wireless Networks**” (see Figure B).

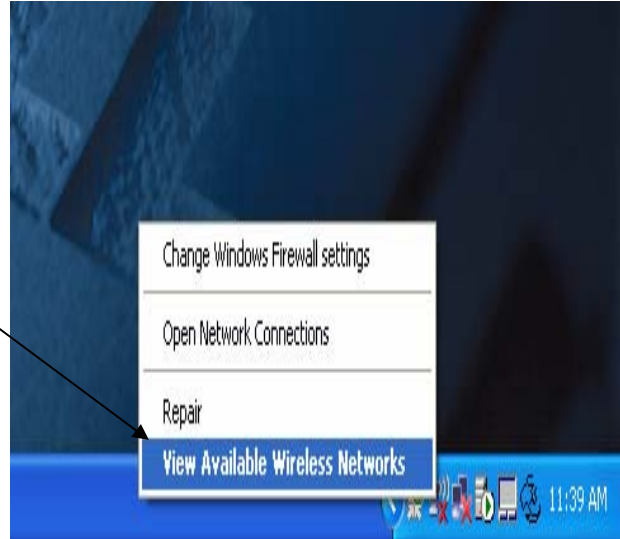

Figure B

3. The following screen appears “**Wireless Network Connection**”. Click “**COG-Hotspot**” will highlight (see Figure C).
4. Then click “**Connect**” button (see Figure C).

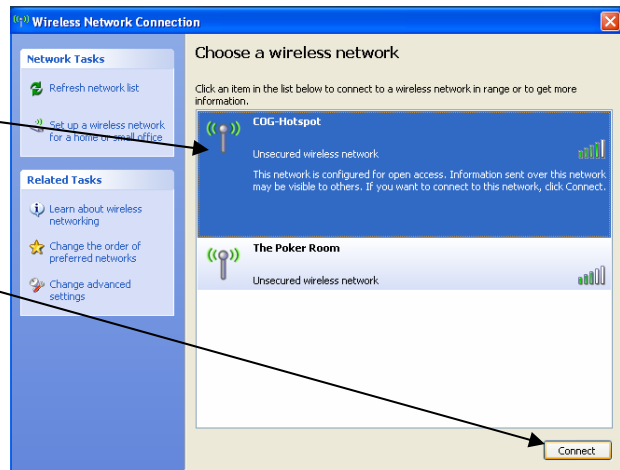

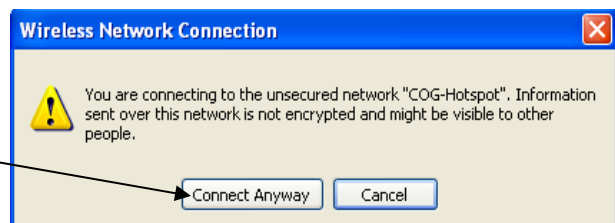

Figure C

5. The following pop-up screen appears. Windows XP alerts the user if the user is about to connect to an open “**COG-Hotspot**”. Click “**Connect Anyway**” button (see Figure D).

How to configure your Windows XP PC for Gilroy Wireless Hotspot?

- The following “Wireless Network Connection” screen is displayed. The screen confirms you have successfully connected to the Wireless “COG-Hotspot” (see Figure E).
- Close the “Wireless Network Connection” screen by clicking the red X in the top right (see Figure E).

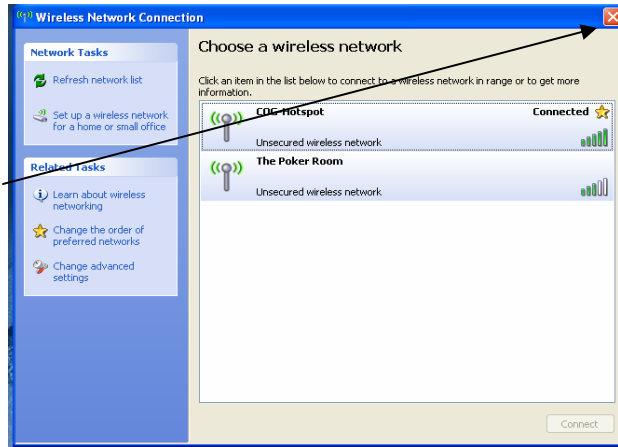

Figure E

- Launch Internet Explorer and the following screen will be displayed. Click the “Yes” button to proceed to the next user authorization prompt (see Figure F).

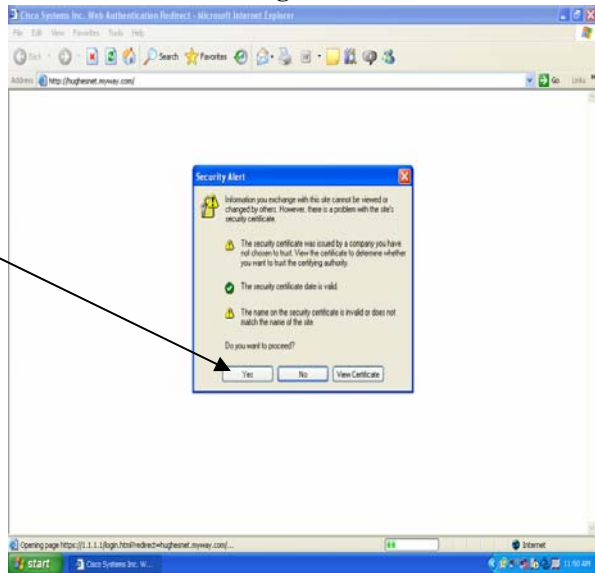

Figure F
