City Launches Free Wireless Connectivity in Downtown Corridor

The City of Gilroy is unveiling a free wireless internet connectivity service for the downtown corridor. The service, to be known as “Gilroy Wireless,” goes live on Wednesday, March 14th, and is an open public network which will provide a free “Hotspot” for all WiFi enabled computers to gain access to the internet, check e-mail, and allow connectivity for business users to access their many company resources via Virtual Private Network (VPN). The wireless service is unsecured, and first-time user authentication which requires the user’s e-mail address is necessary.

Please check the City of Gilroy homepage at www.ci.gilroy.ca.us for “How To” instructions, Security Warning and Disclaimer, and the Gilroy Wireless Network Acceptable Use Policy.

The wireless network spans Monterey Street between 3rd and 8th Streets. There is also limited connectivity on Egleberry between 4th and 7th Streets. Variables such as building construction materials, wall types, and structures between the user and the Hotspots may affect service. The wireless network is available 7 days a week 24 hours a day.
